## BIOVYN website

INOVYN is delighted to announce that strong commercial interest in BIOVYN™ has led us to launch a showcase website so that we can keep pace with fast rising demand, accessible via <http://www.biovyn.co.uk/>,

We're looking forward to taking awareness of BIOVYN™ to the next level by supporting multiple industries and leading the way towards alternatives to fossil-based PVC.

## INOVYN PVC supports UK demand to build COVID 19 vaccination centres

INOVYN is supplying specialty PVC to Altro, a flooring manufacturer, who use it in their 'XpressLay' range. The flooring was recently used to convert a leisure facility into a mass vaccination centre in Glasgow.

## INOVYN is launching a web-based induction programme for drivers.

All drivers coming to INOVYN sites for loading will be required to complete the induction programme before they will be admitted to the site.

The programme, available in many languages, is web-based and can be accessed from any computer, tablet or smartphone. Rheinberg, Stenungsund, Porsgrunn and Rafnes are the first sites to implement the programme from 12 April. The roll out is expected for all the other sites during Q4.

## BIOVYN and "The Hope Project"

The city of Gothenburg, Sweden, is building the first fossil-free preschool which will be ready for play and learning in 2021. Named 'The Hope Project', it will use the most sustainable processes and materials in its construction
